Pranai Basava (Data Analyst)

pranaibasava@gmail.com | +1 (603)-416-4087 | Manchester, NH | Open to Relocation | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience delivering data-driven insights across retail, operations, and supply chain environments, with recent hands-on experience in Salesforce analytics and data governance. Proven ability to design real-time dashboards, automate reporting workflows, and improve data quality through structured stewardship practices. Strong expertise in SQL, Python, SOQL, relational databases, and BI tools (Power BI, Tableau), with hands-on experience supporting enterprise data ecosystems, analysing large-scale datasets, performing root cause analysis, and improving data quality across integrated systems.

EXPERIENCE

Data Analyst **January 2026 – Present**

AdMagic (Oomph Supply Chain Implementers) | Netcong, NJ (Remote)

- Developed and maintained real-time Salesforce dashboards enabling leadership to monitor customer segmentation, pipeline health, and operational KPIs in near real-time.
- Led data stewardship and root cause analysis initiatives by identifying behavioural, process, system, and integration-related data quality issues, improving data consistency and reliability across Salesforce datasets.
- Engineered SOQL queries and Apex-based logic to automate ETL-style data extraction, transformation, validation, and monitoring workflows across integrated Salesforce systems.
- Improved data completeness, accuracy, and governance compliance by implementing validation rules, standardized data definitions, and monitoring processes across enterprise Salesforce objects.
- Designed and implemented custom reports and automated reporting pipelines, reducing manual effort and improving reporting turnaround time.
- Performed data analysis on sales, customer, and inventory-related datasets, supporting decision-making across manufacturing, fulfillment, and retail operations.
- Traced upstream and downstream data flows across interconnected systems to identify reporting inconsistencies, integration failures, and data synchronization issues.
- Performed Salesforce administration activities including object configuration, field management, validation rules, page layouts, user permissions, and production support to ensure reliable business operations.
- Acted as a key contributor in defining data standards and governance frameworks, influencing how business teams capture and utilize Salesforce data.
- Utilized the Seismic sales enablement platform to organize, manage, and analyze sales content and enablement resources, supporting improved access to business and sales information.
- Used advanced Excel capabilities, including PivotTables and VLOOKUP, to analyze, reconcile, and summarize large datasets for reporting and data-driven decision-making.

Business Analyst **June 2025 – January 2026**

Saayam For All | San Jose, California (Remote)

- Led requirements gathering across multiple initiatives by engaging Product, UX, Engineering, and DevSecOps stakeholders, translating business needs into clear BRDs, FRDs, user stories, and acceptance criteria.
- Owned and maintained the Kanban backlog, managing 10-15+ active work items and ensuring smooth flow from intake through delivery while minimizing blockers and rework.
- Analyzed As-Is and To-Be business processes, identifying gaps and recommending improvements that delivered 15–25% gains in operational efficiency.
- Acted as the primary liaison between business and technical teams, reducing requirement ambiguities and downstream defects by ~20%.
- Developed dashboards, KPI reports, and analytical insights using SQL, Python, and BI tools, enabling data-driven and predictive trend analysis for decision-making.
- Leveraged advanced Excel capabilities, including PivotTables and VLOOKUP, streamline data analysis and support accurate reporting.

Business Analyst **December 2020 – December 2022**

Tata Consultancy Services | Mumbai, India

- Supported enterprise-scale retail analytics initiatives involving large-scale relational datasets across sales, inventory, promotions, and customer systems spanning 500+ retail locations.
- Worked closely with leads and managers to translate business needs into clear functional requirements, data specifications, and reporting logic, supporting Agile delivery cycles.
- Designed and enhanced Tableau and Power BI dashboards consumed by senior leadership, improving visibility into sales performance, store-level KPIs, and promotional effectiveness.
- Performed root cause analysis and large-scale data analysis using SQL, Python, and advanced Excel (PivotTables,

VLOOKUP, Conditional Formatting) to identify anomalies, data inconsistencies, seasonality patterns, and operational trends.
- Contributed to the automation of recurring sales and operational reports, reducing manual effort by 50–60% and accelerating reporting turnaround for business teams.
- Communicated insights, risks, and progress updates to stakeholders through structured reports and presentations, supporting timely decision-making in a fast-paced retail environment.

COMPETENCIES & TECHNICAL SKILLS

1. **Data Analytics & Machine Learning:**
   Python, R, SQL (ANSI SQL, MySQL, PostgreSQL, SOQL), Pandas, NumPy, Scikit-learn, Exploratory Data Analysis (EDA), Data Wrangling, Feature Engineering, Regression, Classification, Clustering, Forecasting, Model Evaluation, A/B Testing
2. **Business Intelligence & Visualization:**
   Power BI, Tableau, Excel (Advanced - PivotTables, VLOOKUP, Conditional Formatting), KPI Development, Dashboards, Data Storytelling, Reporting Automation
3. **Salesforce & Data Governance:**
   Salesforce, SOQL, Data Loader, Apex (basic), Data Stewardship, Data Governance, Data Quality Audits, Data Validation, CRM Analytics
4. **Cloud & Data Engineering:**
   AWS (S3, Glue, Redshift, Athena, Lambda), Snowflake, ETL/ELT Pipelines, Data Warehousing, Data Lakes, Apache Airflow, Relational Databases, Data Modeling, Data Mapping, Data Lineage, Enterprise Data Architecture, SQL Performance Optimization
5. **Tools & Technologies:**
   Git, GitHub, Jupyter Notebook, Visual Studio Code, PyCharm, Linux, Docker (basic), CI/CD (basic)
6. **Business & Agile Practices:**
   Agile (Scrum/Kanban), SDLC, Requirements Gathering (BRDs, FRDs), User Stories, Stakeholder Management, UAT, Process Improvement, Seismic sales enablement platform

SELECTED PROJECTS

Seoul Bike Sharing System - GitHub **March 2025**
- Built an end-to-end interactive Tableau story (4–5 dashboards) analysing hourly bike rentals (8,760 records) with weather, seasonal, and holiday factors to identify demand drivers.
- Delivered time-series and peak/off-peak insights to support urban mobility planning, fleet optimization, and data-driven operational decisions.

Retail Sales Forecasting (Predictive Models) - GitHub **December 2024**
- Developed and compared multiple predictive models (Linear & Logistic Regression, Decision Trees, Random Forest, Neural Networks) using R (Caret) to forecast sales for a mid-sized tire company.

S&P 500 Companies Analysis (Python, Excel, Tableau) - YouTube **July 2024**
- Analysed financial performance and industry trends across S&P 500 companies using Python and Excel.
- Created executive-ready Tableau dashboards and presented insights through a public data storytelling video.

EDUCATION

Master of Science in Information Technology **August 2023 – April 2025**
Southern New Hampshire University | Manchester, NH
Concentration: Business Analytics
- GPA: 3.97/4.00 | International Merit Scholarship
- Relevant Coursework: Predictive Business Analytics, Project Management, Applied Data Structure and Database, Object Oriented Application Development, Capstone in Info Technology, Design of Decision Support Systems, Telecommunications and Networking, Advanced Information Technology

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AWS Certified Cloud Practitioner -** Amazon Web Services (Issued March 2025)
- **Salesforce Administrator Certification** - In Progress
- Completed multiple certifications (DataCamp, Udemy) covering Python (Data Structures, Pandas, NumPy, Matplotlib, Django basics), SQL (ANSI SQL, MySQL, PostgreSQL), Tableau, Power BI, Git & GitHub, and Shell Scripting.
